CUPPING MESSAGE THERAPY

We can tell you all about how cupping is a truly effective treatment to mobilize the fascia and greatly enhance deep tissue work. Or we can tell you how cupping uses negative pressure inside the cup to rapidly facilitate rigid soft tissue release by stretching it away from underlying structures, thus loosening areas of adhesions and restrictions, all while breaking up and draining stagnation and increasing blood and lymph flow to skin and muscles in ways not possible using compression ... but that seems rather wordy. What we CAN tell you is that cupping lifts tissue upward with gentle suction to increase circulation - like a massage in reverse - and it works incredibly well.

REFLEXOLOGY

A centuries-old technique where the practitioner applies precise and steady pressure to specific areas of the foot. Aside from relieving stress and tension, reflexology is based on the concept that every part of the body correlates with specific points on the feet and this technique helps restore balance and revitalize energy.

WAXING

Why waxing? First, it leaves you smooth, sleek and silky. Waxing lasts longer than shaving and is less abrasive. It's fast and convenient and more cost effective compared to other professional hair removal services. Our waxing services will leave your skin hair-free and fabulously smooth. Before your waxing service, please allow hair to grow to roughly the size of a grain of rice (about ten days of hair growth).

If you are taking Retin A or Acutane, waxing services cannot be performed. Skin care products that contain glycolic acids or alpha hydroxy acids must be discontinued 3-5 days before waxing services.
